# SureCall Sentry™

Remote Monitoring and Control System

FEATURES AND BENEFITS

- Compatible with SureCall's Force5, Fusion5s, Fusion5X, Force7 Industrial and Guardian3, the Sentry hardware optimizes installations and provides remote access to the booster

- Quickly pinpoints malfunctions due to unforeseen changes such as newly installed cellular towers or repeater systems

- Immediately notifies installers or end-users via email about booster failures or over-powering

- Optimizes 3G and 4G speed

- Remotely adjust and control uplink, downlink or band
